Super Cleaner Super Flush Super Sealer Water Pump Lubricant

Zerex Super Cleaner

The Zerex Super Cleaner has a high performance, patented formula 5,062,987 that removes radiator solder bloom, rust, scale and other deposits that quick flushes miss. It is safe for all cooling system metals including aluminum.

The advanced formula reduces engine coolant and engine oil operating temperatures for cooling systems with initially restricted cooling system passages and radiator tubes. The Zerex Super Cleaner is safe for use on all cooling system components, metallic and non-metallic.

Zerex Super Flush

The Zerex Super Flush contains powerful, fast acting metal cleaning agents to restore cooling system efficiency by removing light rust, scale and oily residue in just ten minutes. The Zerex Super Flush is a unique, patented formulation, 5,342,537 developed through laboratory and field testing.

The Zerex Super Flush can be used on all cooling system metals and plastics. It will not harm paint or vehicle finishes and can be removed with water. Residual flush in the cooling system will not adversely affect coolant performance. The flush is intended for rapid, light cleaning, use a cleaner for heavy deposits or solder bloom.

Zerex Super Sealer

The Zerex Super Sealer stops cooling system leaks and helps prevent future occurrences. The non-clogging formulation seals leaks where other products may fail. It is safe for all cooling system metals including aluminum. It is non-foaming and can be used with all types of engine coolants.

The Zerex Super Sealer has been NASCAR track tested and race proven with the Richard Petty Motorsports Dodge teams. Zerex is proud to have been selected for these applications.

Zerex Water Pump Lubricant and Protector

The Zerex Water Pump Lubricant and Protector is a patented 5,702,631 cooling system additive formulation designed to protect all cooling system metals from corrosion. It also helps protect nonmetallic parts in the cooling system, like gaskets, hoses and seals.

The Zerex Protector prevents the accumulation of cooling system deposits and helps lubricate the water pump. The Zerex Protector is recommended to boost any engine coolants protection and for those who want to recharge the coolant corrosion protection but do not want to change the fluid. It can be used in stored vehicles like collector cars, classics, hot rods and specialty vehicles, for applications where enhanced corrosion protection is a concern.
